

AWS EC2 Ubuntu Server Deployment and Configuration

By Satish Pawar

Project Overview

This project demonstrates the deployment and configuration of an Ubuntu Server on AWS EC2. The objective was to gain hands-on experience with cloud computing, Linux server administration, networking, and secure remote access using SSH.

Technologies Used

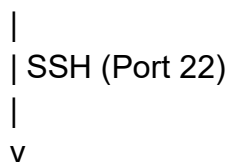

- Amazon Web Services AWS EC2
- Ubuntu Server Ubuntu Server
- SSH
- Linux Commands
- Security Groups
- VPC Networking

Project Objectives

- Launch an Ubuntu Server EC2 instance.
- Configure Security Groups.
- Create and manage SSH key pairs.
- Connect securely using SSH.
- Perform basic Linux administration tasks.
- Understand cloud infrastructure fundamentals.

Project Architecture

Local Computer

AWS EC2 Ubuntu Server

Implementation Steps

Step 1: Login to AWS Console

Logged into AWS Management Console.

Step 2: Launch EC2 Instance

- Opened EC2 Dashboard.
- Clicked Launch Instance.
- Named instance: Ubuntu-Server.
- Selected Ubuntu Server AMI.
- Chose t2.micro instance type.

Step 3: Create Key Pair

- Generated a new key pair.
- Downloaded the .pem file securely.

Step 4: Configure Security Group

Allowed:

- SSH (Port 22)

Step 5: Launch Instance

Successfully launched the Ubuntu Server instance.

Step 6: Connect Using SSH

Example command:

```
ssh -i ubuntu-key.pem ubuntu@<public-ip>
```

Step 7: Verify Server Access

Checked server details:

```
hostname
```

```
whoami
```

```
pwd
```

Step 8: Update Ubuntu Server

```
sudo apt update
```

```
sudo apt upgrade -y
```

Step 9: Install RDP Package (XRDP)

Installed XRDP for remote desktop access:

```
sudo apt update
```

```
sudo apt install xrdp -y
```

```
sudo systemctl enable xrdp
sudo systemctl start xrdp
```

Verified service:

```
sudo systemctl status xrdp
```

Step 10: Configure Security Group for RDP

Added inbound rule:

Type Port

RDP 3389

Step 11: Connect via Remote Desktop

Used Windows Remote Desktop Connection and connected using:

Public IP Address

Ubuntu Username

Ubuntu Password

Skills Gained

- AWS EC2 Administration
- Linux Server Administration
- Ubuntu Server Management
- SSH Configuration
- XRDP Installation
- Cloud Computing Fundamentals
- Security Group Configuration
- Remote Server Management

Project Outcome

Successfully deployed an Ubuntu Server on AWS EC2, configured SSH access, installed XRDP, and enabled remote administration through Remote Desktop.
